VOICE OF THE PEOPLE

EDITOR THE LIMA NEWS:

So war is not enough these days. Strikes here and there and in between.

True, the loan of money is the root of all evil.

Suppose for a moment our men at the front went on a strike and refused to fight for us on the home front, we at home would soon be in an uproar.

Just what do the boys think when they learn about our strikes on the home front?

They would be only too glad if they could be home and live in peace again.

I doubt if we at home really appreciate our blessings.

The boys have a tough job, they're working hard for us and we have no time (or shouldn't have) to lose in strikes.

While the boys are gone we should be praying for them.

Are we really doing our part?
