

"Romance Of Rosy Ridge" To Star Robert Cummings

Robert Cummings replaces the ailing Robert Walker in "This Is My Best's" production of the MacKinlay Kantor story, "The Romance of Rosy Ridge" on Tuesday at 9:30 p. m., Lima time, over Station WABC. It's a tale of Henry, the Yankee school teacher, who went South after the Civil war, and tried to break down the reserve of a tiny community, whose people resented the presence of "furriners." How he manages to win the friendship of the natives and the girl whom he loves, is told in typical Kantor style.

Sixteen thousand War Bond purchasers can't be wrong—but Gracie Allen will be 'way off the beam when she tries to give Jose Iturbi a piano lesson at already-sold-out Convention hall, during the "George Burns and Gracie Allen" broadcast from Philadelphia, Tuesday, at 8 p. m. over WABC.

A dream of murder is revealed as a stark reality in "Nightmare," the "Mystery Theatre" thriller for Tuesday, at 8 p. m. over WEAf.

A few shreds of tangible evidence, and the haunting memory of a murder committed in his slumbers, provide the clues for a baffled killer who seeks to retrace step by step the lurid details of his crime.

The saddest thing in a professional musician's life happens when his instrument ends up in a hock shop . . . but when a whole orchestra goes out looking for a hock shop with the hope of showing a profit, it's a situation that could happen only on "A Date With Judy." That's exactly where it does develop, in the broadcast over Station WEAf, Tuesday, at 7:30 p. m. Judy is responsible for

it all, when she suggests that Oogie Pringle's orchestra audition for the local pawnbroker, in the hope that we will sponsor the band on the air. Louise Erickson stars as Judy in this half-hour of mirth.

NEW FREEZERS SENT TO GI'S IN PACIFIC

WASHINGTON, Nov. 28—(UP) --New portable refrigerators and ice-cream freezers are making life in the steaming Pacific jungle islands more bearable for American soldiers, the War department revealed.

The new lightweight, portable ice cream making unit, being shipped to all theatres in the Pacific, can produce 40 gallons of ice cream in eight hours. An ice cream mix to which only water need be added is provided.

The new portable refrigerator is gasoline operated, capable of maintaining inside temperature at 10 degrees when the outside is 120 degrees. One refrigerator protects enough fresh meat for 400 men. It uses a new type of refrigerant. The cabinet is so sturdy it can stand a four-foot drop without injury.

There is also a new portable
